OTTAWA, CANADA.

### BULLETIN No. 200.

### HIGHLY COLOURED CONFECTIONERY.

OTTAWA, March 9, 1910.

W. J. GERALD, Esq., Deputy Minister of Inland Revenue.

Sir.—I beg to hand you a report upon 149 samples of candy, purchased throughout Canada, in December last. This inspection, like that reported in Bulletin No. 112 (Nov. 1905), has had special reference to the freedom of the colouring matter used in dyeing candies, from metallic impurity, and in particular from arsenic. It is gratifying to find that only a single sample gave any reaction for arsenic, and this a quite negligible trace, entirely harmless.

Inspectors were instructed to procure highly coloured confectionery, since the character of the colouring material was a main object of research. In most cases the instructions were well carried out, and these results may be interpreted to mean that harmless dyes only are employed by Canadian candy manufacturers.

Several samples were dirty and fly-specked, evidently having been exposed, in the shop. It may not be out of place to emphasize the importance of keeping candy in glass, or other close receptacles. It is not enough that a piece of muslin or gauze should be spread over the candy. This is no protection against dust, and in most cases, none against flies.

Incidentally, the nature of the sugar is reported, and it will be seen that the cheaper grades of candy, represented by this collection, contain from 50 to 70 per cent of cane sugar for the softer varieties, and from 70 to 85 per cent for the harder kinds. The other ingredients are of harmless character.

I beg to recommend the publication of this report as Bulletin No. 200.

I have the honour to be, sir,

Your obedient servant,

A. McGILL, Chief Analyst.
